Colorado School District and Counties Map

----- County Border

The Long Road Ahead...

- Children connected to where their food comes from and developing an appreciation and even an interest in the agricultural world
- Institutions working together to support local and regional food systems by collaborating on purchases or through shared services
- Investment in food service workers to build capacity, skills and reinforce the valuable role they play in feeding the masses
- State and Federal Policies in place that prioritize supporting and investing in opportunities that will strengthen our local and regional food systems
